

AZUD

HELIX SYSTEM FT CL

MANUAL DISC FILTERS

Working conditions

Salinity	< 6000 mg/l
Free chlorine concentration	≥ 1.5 mg/l
Max. working pressure	6 bar (87 psi)
Min. working pressure	0.8 bar (11.6 psi)
pH	4 - 11
Water temperature	≤ 60 °C (140 °F)

Filtration degrees (micron)

400	200	130	100	50	20	10	5
-----	-----	-----	-----	----	----	----	---

DESCRIPTION

Manual disc AZUD HELIX SYSTEM FT CL filter available in Ø2", Ø3", Ø4" and Ø6".

AZUD patents, developments and manufacturing quality control guarantee an excellent filtration quality by optimizing operational costs of the installation where it is integrated. Thermoplastic materials used in the manufacture offer an extraordinary resistance and lifespan of all the components of the equipment, minimizing the tasks of inspection and maintenance, which are carried out easily and with no tools.

AZUD HELIX SYSTEM FT CL is specifically designed to optimize the filtration in installations with water with a high chlorine concentration.

MAIN FEATURES

- > **RELIABLE FILTRATION**, thanks to a double effect of centrifugal separation and in-depth 3D filtration with multiple particle retention points.
- > **EXCLUSIVE BUTTERFLY SYSTEM FOR LOCKING THE FILTRATION ELEMENT**, this system allows for an easy decompression of the disc stack to facilitate cleaning.
- > **MINIMUM BACKWASH FREQUENCY**, thanks to the patented anti-clogging deflector AZUD HELIX and an increased filtration area per filter element.
- > **PLUG&PLAY AND MODULAR SOLUTION.**

HOW DO THEY WORK

TECHNOLOGY

- Water flows from the inlet manifold to the inside of the filter, passing through the anti-clogging deflector AZUD HELIX, which throws the heavy particles away from the disc stack, avoiding the quick clogging of the filter and minimizing the backwash frequency.
- Water flows OUT-IN through the disc stack to the outlet manifold while particles bigger than the filtration degree are trapped in the discs.

2N, 2S, 3C, 3N

4N, 4S, 6N

HEAD LOSS

MATERIALS OF CONSTRUCTION

MG Discs	Polypropylene
WS Discs	High density polyethylene
Disc support	Reinforced polypropylene
Base – lid	Reinforced polypropylene
Clamp	Stainless steel 304
Sealing o-rings	Nitrile rubber
